Hi Randy, I am sending this late Monday afternoon and hope that you are staying safe and dry, and your friends and family are also safe, secure, and dry.

Since you have offered to help a couple of times lately, I'm going to take you up on your offer. Maybe we can make some progress together.

Could you provide a list of parties who have not been identified as PRP's by EPA, however you believe sent hazardous waste to the Site, but have not joined the PRP group.

Also, do you have a Waste in List of the most basis information, which would be a listing of the highest contributors. Period, Not hazardous substance or hazardous waste, just the biggest contributors.

On another topic, do you have a manifest for Coastal Chemical that shows an hazardous substance code, probably an H at the end of the 8 digit waste code. If so, could you email me a copy?

Any yet on another topic, from June 1983 through December 2001, a Swiss Limited Liability Company called Covesud S.A, owned 400 N. Richey. I have been able to find out very little about this company. Do you have anything you could share that might help me locate them. I don't know if they actually did any business at the site or not.

Thanks and if you are working on Tuesday, perhaps we can talk then.

Be Safe.
